Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Origin. The term positive psychology dates back at least to 1954, when Maslow's first edition of *Motivation and personality* was published with a final chapter titled "Toward a Positive Psychology." In the second edition (1970), he removed that chapter, saying in the preface that "a positive psychology is at least available today though not very widely."
