Kinase inhibitors are an important class of drugs that block certain enzymes involved in diseases such as cancer and inflammatory disorders. There are hundreds of kinases within the human body, so knowing the kinase's target of each drug is essential for developing successful treatment strategies. Sometimes clinical trials can fail because drugs bind more than one target.

The target landscape of clinical kinase drugs | Science

AAVLD and USAHA are the premier organizations providing you the latest information on veterinary diagnostic laboratory science, animal health, and disease regulation policy throughout the United States.
