The Knight-Trak Signal Input Board (SIB) is an interface module which receives pump activation signals of 14

to 240 Volts from the washmachine and sends them as low-voltage data signals to the Knight-Trak II Dispenser. The module is available in 6, or 10 pump configurations. The SIB should be installed in the washer near the supply signal outputs.

Allied Knight T-150 [ Home ] [ Up ] The Knight T-150 and T-150A have a generally poor reputation for spectral purity. As originally designed, the T150 and T150A have very high spurious signal levels. Although not perfect without major redesign, they are easily improved if we take time to understand the flaws.
