Figure 3: (a) Transcritical bifurcation; (b) Pitchfork bifurcation is satisfied, then  $0(0) \neq 0$ , and a transcritical bifurcation occurs at  $(0; u_0)$ ; and if  $0(0) = 0$  and  $0(0) \neq 0$ , then a pitchfork bifurcation occurs at  $(0; u_0)$ . By studying the degenerate solutions of (2), we proved the following result of imperfect bifurcation: Theorem 2.2.

In some cases, a reaction-diffusion system can be transformed into an abstract equation where the linear part is given by a polynomial of a linear operator, say Multiparameter bifurcation for this equation is considered as the coefficients of the operator polynomial in are varied.

### **Multiparameter bifurcation for some particular reaction**

Fig. 1. Bifurcation diagrams from an SBA procedure carried out for  $v$  different values of labeled through (full line: stable; dashed unstable; open square: transcritical bifurcation). similar to that in Fig. 1. Cases show no bifurcation point, cases show two turningpoints each, while the intermediate case shows a single transcritical bifurcation.

For a two-dimensional predator-prey system, proposed by Bazykin and depending on several parameters, a  
complete local bifurcation analysis with respect to all parameters is achieved. The major part of the paper is  
devoted to the unfolding of a degenerate codimension-2 bifurcation occurring for a one-dimensional subset of  
parameters. The main problem here consists in studying parameter ...
