

precision machining technology peter pdf

Milling is the process of machining using rotary cutters to remove material by advancing a cutter into a workpiece. This may be done varying direction on one or several axes, cutter head speed, and pressure. Milling covers a wide variety of different operations and machines, on scales from small individual parts to large, heavy-duty gang milling operations.

Milling (machining) - Wikipedia

Precision Resource's Canada Division appeared in the April 2017 issue of Shop Metal Working Technology magazine. In the article, you can read about how Precision Resource and Blum Novotest teamed up to create a solution that improved efficiency and quality with the use of a laser tool measuring system.

Numerical control (NC) (also computer numerical control (CNC)) is the automated control of machining tools (drills, boring tools, lathes) by means of a computer. An NC machine alters a blank piece of material (metal, plastic, wood, ceramic, or composite) to meet precise specifications by following programmed instructions and without a manual operator.
